Hold fast to dreams

For if dreams die

Life is a broken-winged bird
That cannot fly.

Hold fast to dreams

For when dreams go

Life is a barren field

Frozen with snow.

Langston Hughes

"The glory of life is to love, not to be loved, to give, not to get; to serve, not to be served."

These words tell a story of the life of our friend, Mrs. Naomi Benson. The glory of her life was to love her husband, family and mankind in many different ways. As a wife and mother she came to our community at California Lutheran College with a lot to give. Mrs. Benson gave her friendship to all. Also the opportunity to share with her, the love of God and faith in Him.

Mrs. Benson served God and friends in the best way she knew how. Not only did she aid many of us back to good health, but also consoled us and gave us faith and a smile.

We are honored to dedicate our annual to one who loved, gave and served God and mankind.

With our love we thank you, Mrs. Benson.

College of Lice and Crabs

WHAT YOU NEED TO KNOW ABOUT LICE INFESTATION

There are three kinds of lice:
The head louse, the body louse and the pubic or crab louse. These all can infect the human body, depending upon whether the person comes in contact with other persons and objects which are infected with the adult louse or its eggs (nits). The adult louse is approximately 1 to 2 mm in size. While lice themselves seldom cause serious trouble, they do produce severe itching, the scratching of which sometimes causes skin lesions and infections.

What are the symptoms of lice infestation?

* Finding eggs (nits) attached to hairs of the body or in seams of clothing. When nits are found, they are easily detected by their small grayish bodies.

* Observing minute blood specks or tiny bluish or slate colored stains under the skin which are caused by the louse sucking blood.

* Having severe itching and possibly developing rough, red and scabbed skin from long-lasting infestations.

How to get rid of lice:

* Clothing — when a person is found to be infected with body or pubic lice, clothing should be thoroughly disinfected. This can be done by laundering all washable clothes and linens for at least 5 minutes in very hot water. Non-washable clothing can be dry cleaned or sprayed with "Sla," a spray insecticide available in local stores such as the Broadway.

* Body — thorough bathing and shampooing of the hair with special shampoos and lotions which are available. Directions should be carefully followed.

* Personal toilet articles — grooming articles which come into contact with the hair (brushes, combs) should be thoroughly cleaned with hot soap and water.

What can be done to prevent infestation?

* Personal cleanliness — thorough and regular bathing, including shampooing of hair.

* Clothing — thorough washing or dry cleaning of clothing regularly.

* Staying away from those suspected to be infested with lice.

* Not wearing other's clothing if it is not thoroughly cleaned when lice infestation is suspected.

* Occasionally checking one's body for lice eggs (head lice eggs attach to hair close to the scalp; body lice eggs attach principally in the seams of clothing; and pubic lice eggs attach to the hairs in the genital regions, underarms and eyebrows).

Anyone can pick up lice from someone else's person or clothing. At the first sign of suspected lice infestation, contact the health center — the main thing is to GET RID of them AT ONCE!

The May 9th Yam Yad of '73 will go down in CLC history as the safest and sanest. This was the test year for Yam Yad as to ever having it again and it passed with flying colors. This year's Tri-Chairmen of Yam Yad were Mike Dyo, Ray Hebel, and Doug Laube with Barry Ybarra as entertainment chairman. The day-time activities were held at the western set of the old Paramount Ranch, followed by one of Lil's all-time barbeques in Kingsman Park and finally a great dance in the sports arena from 9:00 to 2:00 a.m.
